Coding & Solution

Date	30 SEPTEMBER 2026
Team ID	SWTID-2026-1660
Project Name	AI WEATHERWISE API
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	-
Programming Language(s)	JavaScript, HTML, CSS
Framework(s) Used	Node.js, Express.js
Key Features Implemented	Login, Register, Weather, Weather Summary, Recommendation
Pending / Incomplete Features	None
Setup / Run Instructions	• Install **Node.js**. • Open the project folder in **VS Code**. • Open the terminal. • Run `npm install`. • Configure the Weather API key in `.env`. • Run `npm start`. • Open the localhost URL in a browser.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The AI WeatherWise API provides weather information through a simple and user-friendly web application. It includes authentication, weather details, weather summary, and recommendations. The system uses API integration and error handling to provide reliable results.
